Using Internet in Windows

अध्याय सामग्री

Internet Browser

An Internet Browser (like Chrome, Edge, Firefox) is software used to access and view websites. It translates web pages (HTML, CSS, JavaScript) into a visual format for users. Common features include tabs, bookmarks, history, and search bar.

Examples: Google Chrome, Microsoft Edge, Mozilla Firefox, Safari.

How to Work with a Browser

- Open the browser by clicking its icon (e.g., Chrome, Edge).
- Type a web address (URL) or search keywords in the address bar.
- Use tabs to open multiple websites at once.
- Manage bookmarks to save favorite sites for quick access.
- Access settings to customize privacy, language, and appearance.

 Quick memory tip: Browser = gateway to the internet; Tabs = multitasking; Bookmarks = shortcuts.

WWW (World Wide Web)

- A system of interlinked documents and resources accessed via the internet.
- Uses web browsers to display pages written in HTML.
- Invented by Tim Berners Lee in 1989.
- Provides services like websites, multimedia, and online applications.

URL (Uniform Resource Locator)

- The address of a resource on the web (e.g., https://www.example.com).
- Consists of protocol, domain name, and path.
- Used to locate and access websites or files.
- Example: http://www.google.com is a URL.

Search Engines

- Software systems that help users find information on the web.
- Work by indexing websites and retrieving results based on keywords.
- Examples: Google, Bing, Yahoo.
- Provide ranked results, images, videos, and news.

 Quick memory tip:

- WWW = network of resources
- URL = address of a resource
- Search Engine = tool to find resources

Searching Information in Wikipedia:

- Open a Browser – Start an internet browser like Chrome, Edge, or Firefox.
- Go to Wikipedia – Type www.wikipedia.org in the address bar.
- Choose Language – Select your preferred language (e.g., English, Hindi).
- Use Search Box – Enter keywords or topic name in the search bar.
- Browse Articles – Click on the result to read detailed information, with links to related topics.

 Quick tip: Wikipedia articles often have contents, references, and external links that help in deeper study.

Subscribing and Reading Newspapers Online

- Visit the official website of a newspaper or use news apps.
- Many sites offer subscription plans for full access.
- Free versions usually allow limited articles per day.
- Online newspapers provide updated news, archives, and multimedia.
- Easy to read anytime with internet access.

Typing Text in Regional Language

- Go to Control Panel → Clock, Language, and Region → Language settings.
- Add your preferred regional language (e.g., Hindi, Tamil).
- Use the language bar/keyboard layout to switch between languages.
- Typing can be done using phonetic keyboards or input tools.
- Helps in creating documents, emails, or notes in local languages.

 Quick tip: Online newspapers = information access, Regional typing = personalization.

Google Maps:-

- Google Maps is a web based service that provides maps, satellite imagery, and street views.
- It helps users find locations, directions, and routes for driving, walking, cycling, or public transport.
- Offers real time traffic updates and estimated travel times.
- Includes features like nearby places (restaurants, shops, ATMs) and business information.
- Widely used for navigation and exploring new areas.

 Quick tip: Google Maps = Location + Directions + Traffic + Nearby Places —

Online Ticket Booking

- Visit official websites or apps (IRCTC for trains, airline sites, bus portals).
- Select journey details (date, destination, seat).
- Make payment online via card, UPI, or net banking.
- E ticket is generated and can be printed or shown digitally.

Applying for PAN Card Online

- Go to the NSDL or UTIITSL portal.
- Fill in the application form with personal details.
- Upload required documents (ID, address proof).
- Pay the fee and submit; PAN card is delivered by post.

Applying for Passport Online

- Visit the Passport Seva website.
- Register and fill in the application form.
- Pay fees and schedule an appointment at Passport Seva Kendra.
- Attend verification; passport is issued after approval.

Applying for Aadhaar Card Online

- Aadhaar enrollment is done at centers, but updates/downloads are online.
- Visit UIDAI's myAadhaar portal.
- Services include downloading e Aadhaar, updating details, and booking appointments.
- Aadhaar is used as a universal identity proof.

Paying Electricity Bill Online

- Visit the electricity board's official site or use apps like Paytm, Google Pay.
- Enter consumer number and view bill details.
- Pay securely via digital payment methods.
- Receipt is generated instantly.

Paying Service Tax Online

- Done through the GST portal (since service tax merged into GST).
- Businesses log in, file returns, and pay tax online.
- Ensures compliance and transparency.

Booking Gas Refill Online

- Visit the LPG provider's website/app (Indane, HP Gas, Bharat Gas).
- Log in with consumer ID.
- Book refill and choose payment mode (online or cash on delivery).
- Confirmation and delivery details are provided.

 Quick memory tip:

- Tickets, PAN, Passport, Aadhaar = Identity & Travel
- Bills, Tax, Gas = Utilities & Services

Downloading eBooks

- Visit trusted websites or apps (like Google Books, Amazon Kindle, Project Gutenberg).
- Search for the required book title or author.
- Choose the format (PDF, EPUB, MOBI) and click Download or Buy.
- Save the file to your computer or mobile device.
- Open it using an eBook reader or PDF viewer.

Free eBooks are often available on educational sites (Project Gutenberg, Open Library), while paid eBooks are on platforms like Kindle
